SUMMARY

Data Analyst with expertise in **SQL, Python, Power BI, Tableau, Excel, and MySQL**. Experienced in data analysis, dashboard development, KPI reporting, SQL optimization, and generating strategic recommendations to improve marketing effectiveness.

SKILLS

Data & Analytics: SQL, MySQL, Python, Data Analysis, KPI Tracking, Business Reporting, Data Visualization, Trend Analysis

Bi & Visualization: Power BI, Tableau, Excel (Advanced), Interactive Dashboards, ETL Workflows, Data Preparation

Marketing Analytics: Campaign Analytics, KPI Reporting, Customer Retention, Business Intelligence, Customer Acquisition

Database: Data Modeling, Query Optimization, Normalization (1NF-3NF), Data Governance, Data Quality, RDBMS

Programming Language: C++, Python, JavaScript, Node.js, React.js

WORK EXPERIENCE

SEP 2025- MAR 2026

Internship | SQL & Database | Trixno

Tech Stack: MySQL, SQL, Excel, REST APIs, Git

- Developed and optimized **30+ SQL queries** using JOINS, Subqueries, CTEs, and Indexing, reducing query execution time by **46%** and improving data retrieval efficiency by **35%** for reporting and analysis.
- Cleaned, validated, and maintained **15,000+ relational database records**, ensuring data accuracy, consistency, and integrity while supporting business reporting and analytics.
- Assisted in integrating **5+ REST API endpoints** with SQL databases, enabling efficient data retrieval and supporting scalable backend data workflows.
- Collaborated with developers and business teams to understand data requirements, troubleshoot database issues, and generate SQL based reports that supported data-driven decision-making.

Internship| Data Analyst | Reyrinbafs Designs

MAR 2025 - JUN 2025

Tech Stack: SQL, Power BI, Microsoft Excel, Python (Pandas), DAX, Power Query

- Analyzed **20,000+ customer records** to identify acquisition trends, identify acquisition trends, marketing effectiveness, and revenue opportunities, delivering actionable insights for marketing optimization.
- Developed interactive dashboards and comprehensive reports using SQL, Power BI, and Excel to monitor KPIs, customer acquisition, campaign performance, and business metrics.
- Cleaned, transformed, and validated **25,000+ data records** using SQL, Excel, and Power Query, enhancing report reliability and creating trusted analytical datasets
- Presented analytical reports and recommendations to **5+ stakeholders**, supporting customer acquisition strategies and data-driven business decisions.

PROJECTS

2025-2026

Startup Collaboration | Calm&Clarity – Data Analyst & Web Developer

(Ongoing)

Tech Stack: SQL, MySQL, Power BI, Excel, Node.js, Express.js, MongoDB

- Evaluated **100+ customer and operational records** using SQL and MySQL to identify business trends, improve workflows, and support data-driven decision-making.
- Engineered database queries and backend data pipelines, reducing manual operational effort by **45%** while improving reporting efficiency and data accessibility.
- Delivered **5+ KPI dashboards and analytical reports** by integrating business and operational data, enabling stakeholders to monitor customer engagement and key performance metrics.

GTA VI Sales Forecasting & Market Intelligence Dashboard

Tech Stack: Power BI, SQL, MySQL, Python, Pandas, Excel, Html, CSS, Java Script

- Scraped, cleaned, and **integrated 100,000+** simulated gaming market records using **Python, SQL, and Power Query** to create a structured dataset for predictive sales and revenue analysis.
- Engineered an interactive Power BI dashboard **featuring 20+ business KPIs** to visualize projected revenue, estimated game sales, regional demand, platform performance, market share, and pricing insights.
- Built predictive models using SQL, DAX, and historical gaming market trends to estimate GTA VI's projected sales, revenue potential, regional demand, and platform performance.

Ecommerce Sales & Customer Analytics Dashboard

Tech Stack: SQL, MySQL, Power BI, Excel, React.js, Node.js, MongoDB

- Investigated **30,000+ sales and customer transaction records** using SQL, identifying purchasing patterns that contributed to a **22% improvement** in conversion rates.
- Constructed **25+ SQL queries** and business reports to monitor sales performance, customer behavior, and key business KPIs, enabling faster data-driven decisions.
- Converted raw transactional data** into interactive dashboards and business intelligence reports, improving data accessibility for sales and marketing teams.

CERTIFICATIONS

2022-2025

- Master's in data Structure using Python** - Coding Blocks
- Google Data Analytics Professional Certificate**- Google

EDUCATION

2022-2025

Bachelor of Technology in computer science engineering, Galgotias University

CGPA: 7.55
